

Having signed on to Earth Hour 2019, the Formentera Council will turn of the lamps illuminating the Sant Francesc church tomorrow, Saturday March 30 between 8.30pm and 9.30pm, as a symbolic gesture to promote energy-saving efforts.

CiF environment councillor Daisee Aguilera said that, along with the administration's adhesion to the event, the Council has committed to “educating islanders about the multiplicity of earth-friendly measures at their disposal, like conserving energy, reducing single-use plastics and opting for more sustainable modes of transport”. “They're small steps”, she said. “When all of us do them, though, they become huge”.
