

The Formentera Department of Environment reports that, in line with a request from the Official College of Pharmaticists in the Balearic Islands, crews have ramped up their efforts to clean and disinfect pavements adjacent to urban pharmacies across Formentera.

Pharmaceutical professionals have pointed out the current health emergency has seen a jump in visits to chemists, with attendant queues of customers waiting for their turn to enter. Formentera's municipal cleaning services use special disinfectant cleaner and pressure washers in these areas and other busy urban spaces.
